#### Shire of Wongan-Ballidu Variance Report for August 2013

The Local Government (Financial Management) Regulations 1996 require that financial statements are presented on a monthly basis to council. Council has adopted 10% as its threshold for line items on the nature and type report shown on page 1. This report uses a traffic light system to flag those items that are within tolerance and others that fall out of the range. Variances are calculated using a comparison of year to date actual against year to date budget. It needs also to be noted that the early months of the financial year are a period when variance percentages are volatile and extremely sensitive to small movements in actual income and expense.

Code	Report Section	Comments
8 3		Operating Income
×	Grants Operating, Subsides & Contributions	Grant receipts are tracking well above budget (almost twice budget at \$ \$69,900), however this is a small variance in the context of the full years budget of \$1.2 mill.
×	Fees & Charges & Service Charges	Whilst over predicted August levels, these items are still expected to meet (and not exceed) full year's budget.
0	Other Revenue	Less funding received then budgeted.
×	Interest	2013-14 revenues are to be reduced by revenue actually earned last financial year. The August figures reflect those balance day adjustments.
1		Operating Expenditure
0		
×	Insurance	Payment of the deposit annual premiums has been made. Based upon the fact that the deposit represented 63% of the final cost last year, the outturn for 2013/14 is currently estimated at \$254,000 against \$213,752. This estimate, whilst realistic, is not concrete as insurance costs are beyond Shire control and the deposit may not be exactly 63%.
0	Other - General	Conference, discounts, bad debts and donations all down in August.
0	Loss on Asset Disposals	No assets were sold in July or August.
200		Capital
0	Land & Building	With the exception of the CRC building, no building, capital expenditure has commenced in July or August.
0	Furniture & Equipment	Most computer hardware on budget has been procured, and whilst over budget YTD, the expenses are still estimated to be within overall annual estimates for computer "capex"
0	Plant & Motor Vehicles	Only loader bought at this stage.
0	Infrastructure - Road & Other	Under Budget due to greater focus on maintenance type items.

#### PURPOSE OF REPORT:

Adopt the Draft Corporate Business Plan and the Workforce Plan

#### BACKGROUND:

The Minister of Local Government issued Circular 31/2012 in regards to the new Strategic and Community Planning and Corporate Business requirements which come into effect on 30 June 2013.

Section 5.56 of the Local Government Act 1995 requires local governments to prepare a plan for the future of the district. Regulations were published on 26<sup>th</sup> August 2011in the Government Gazette about the Strategic Community Plan (SCP), and this is summarized below.

#### COMMENT:

The Corporate Business plan and the Workforce Plan has been completed and reviewed by Council and staff, and the minor changes incorporated into the documents.

#### POLICY REQUIREMENTS:

There are no known policy requirements in relation to this item.

#### LEGISLATIVE REQUIREMENTS:

Sections 5.56 of the Local Government Act

#### SUSTAINABILITY IMPLICATIONS:

#### Ø Environment

The nature of the Strategic Community Plan, Corporate Business Plan and Informing Strategies is that they will impact on the environment in some form or fashion the nature and extent will need to be assessed on an individual ad hoc basis

#### Ø Economic

The Strategic Community Plan, Corporate Business Plan and Informing Strategies guides the long term commitment of Council to fund much needed community projects and infrastructure. This contributes directly to economic growth and underlying sustainability.

#### Ø Social

The Strategic Community Plan, Corporate Business Plan and Informing Strategies addresses the infrastructure needs of the community and hence has positive social externalities.

#### FINANCIAL IMPLICATIONS:

The Strategic Community Plan is a high level document upon which the annual budget is based.

#### VOTING REQUIREMENTS: ABSOLUTE MAJORITY REQUIRED: Yes

#### PURPOSE OF REPORT:

To consider the reduction of the number of elected members from nine to seven members.

#### BACKGROUND:

Councils motion of October 2010:

MOTION: MOVED Cr Hood/Cr Barrett-Lennard

That Council In accordance with Schedule 2.2(9) of the Local Government Act 1995 recommended to the Local Government Advisory Board that;

1. An order be made under Section 2.18 to designate the number of offices of Councillor to be nine (9) from the existing eleven (11) with effect from October 2011.

#### CARRIED BY AN ABSOLUTE MAJORITY: 6/3 RESOLUTION NO: 090810

Reason for Decision: Council felt that the transition from eleven to seven was to great at this time.

Council has as a result of the local government reform process agreed to review the number of elected members with a view of reducing the number down to seven elected members.

As required under the Act, Council is required to give local public notice that a review is to be carried out and seek submissions giving at least 42 days from the date of the first notice.

A discussion paper based on the previous review will be made available to residents and ratepayers outlining the review process and providing some of the options.

#### COMMENT:

Three options are included in the discussion paper available to residents and ratepayers, the paper will invite comment on any other options that ratepayers or residents wished to comment on;

When assessing options as part of the review the following factors need to be considered,

- · Ratio of Councillors to electors in various wards
- · Community of Interest
- Physical and topographical features
- · Demographic trends
- Economic factors

The advantages and disadvantages outlined of seven councillors are discussed in the discussion paper as follows;

The advantages of a reduction in the number of elected members may include the following:

- The decision making process may be more effective and efficient if the number of elected members is reduced. There is more scope for team spirit and cooperation amongst a smaller number of people.
- · The cost of maintaining elected members is likely to be reduced.
- The increase in the ratio of councillors is unlikely to be significant.
- Consultation with the community can be achieved through a variety of means in addition to individuals and groups contacting their local elected member.
- A reduction in the number of elected members may result in an increased commitment from those elected reflected in greater interest and participation in Council's affairs.
- Fewer elected members are more readily identifiable to the community.
- Fewer positions on Council may lead to a greater interest in elections with contested elections and those elected obtaining a greater level of support from the community.
- There is a statewide trend for reductions in the number of elected members and many local governments have found that fewer elected members works well.
- If the State Government legislates to pay higher meeting fees and allowances or even a level of remuneration as has been touted, then costs of maintaining extra Councillors could be onerous.

Possible disadvantages of reducing the number of elected members to seven (7) include:

- A small number of elected members may result in an increased workload and may lessen effectiveness. A demanding role may discourage other from nominating for Council.
- There is the potential for dominance in the Council by a particular interest group.
- A reduction in the number of elected members may limit the diversity of interests around the Council table.
- Opportunities for community participation in Council's affairs may be reduced if there are fewer elected members for the community to contact.
- An increase in the ratio of councillors to electors may place too many demands on elected members.

If the Advisory Board accepts the Council resolution to go to seven elected Members, then it is that it is likely that Council will only need to call nominations for two positions of the four current positions coming due at the next election on 20 October 2015 (due to the need to have as near as one half of the Council due for retirement at any one time due to the biennial election cycle).

#### 9.2 WORKS AND SERVICES

#### 9.2.1 PURCHASE OF NEW MOTOR GRADER

FILE REFERENCE:	F1.9
REPORT DATE:	9 September 2013
APPLICANT/PROPONENT:	Shire of Wongan-Ballidu
OFFICER DISCLOSURE OF INTEREST:	Nil
PREVIOUS MEETING REFERENCES:	Nil
AUTHOR	Karl Mickle – Works Coordinator

#### PURPOSE OF REPORT:

The purpose of this report is to provide sufficient information summarising the results of quotations called for the supply and delivery of one new grader to enable Council to award the contract for this purchase.

#### BACKGROUND:

Quotations were called from six (6) vendors for the supply of one new motor grader using the West Australian Local Government's (WALGA) "Preferred Supplier Process".

The use of WALGA's "Preferred Supplier Process" exempts Local Authorities having to call tenders under the Function and General Regulations 1996 of the Local Government Act 1995.

WALGA's "Preferred Supplier Process" offers a little more negotiation flexibility than the rigid tender process and is well supported by regional vendors.

#### COMMENT:

Quotations were received from four (4) of the six (6) vendors for the supply and delivery of one new motor grader.

On the 30<sup>th</sup> August 2013 I organized a grader demonstration day at the Shire depot.

With Only Komatsu attending.

CJD declined.

Hitachi declined.

Westrack declined –Comments from Westrack saying the new 12M grader is pretty much the same as the grader we purchased in 2011.

The submissions received have been short listed to The Cat Grader 12M and the Komatsu GD555-5 Grader

The short listing was based in part on previous experience with current graders and the opportunity afforded to the Shire by Komatsu to test the machine in the field

We currently operate a 12M and therefore it is only a question of the distinguishing features of the Komatsu verses CAT.

All plant suppliers these days have to have a reasonable supply of parts and services to remain in a very competitive market.

Komatsu has improved the design of its new graders in many areas

Firstly the hydraulic hoses are all the same length and configuration and are colour coded this means a breakdown in the field can simply mean removing a hose from a non essential item and fitting it to the required implement.

All servicing and maintenance can be carried out from the ground level.

The Komatsu motor provided in the GD555-5 is the same motor in other Komatsu equipment therefore parts and services would be more readily available.

In relation to the Komatsu a torque converter with a variable power mode means that the machine will virtually not stall when put in the automatic mode this of course eliminates any stresses that may be applied to the drive line from coming in contact with an immovable object whilst maintenance grading.

It is not unusual with our current 12M to stall either under excessive load or where the blade has come in contact with an immovable object this means that stresses have been applied from the blade through the drive line to actually stop the motor.

The operating Komatsu has full view of both toe and heel of the blade right up to where it is manoeuvred under the machine

The circle side shift mechanism eliminates clumsy frame work from the operators view and also provides a quicker and easier relocation of the circle.

Comparing the CAT 12M with the Komatsu GD555-5 it should be recognised that ease of operation should be a primary factor given that operators need to have all their attention on the task at hand. In the 12M the operator has the added concern that when his attention is drawn from one side of the machine to the other he will accidently place pressure on the steering joy stick and then has to go back to correcting the direction that he was steering.

Competent qualified operators do find the joy stick configuration requires more concentration, a conventional steering wheel as in the Komatsu means that once the operator has set the steering his hands are free to operate the other functions of the grader therefore making it easier for the operator.

The following staff all had access to the Grader and provided feedback on its operation

Laurie Walker - Principal Works Supervisor Kim Thornton - Maintenance Operator Rick Ditchburn - Maintenance Operator Peter Boase - Construction Operator Steve Stickland - Maintenance Operator Karl Mickle Work - Coordinator Works & Services

- 2. During the demonstration process all 5 grader operators commented on the great visibility from the cab and the pushing power that the Komatsu had.
- 3. Other comments were comfortable in cabin
- 4. Ease of changing gears with a dual-mode transmission/ torque converter mode.
- 5. Power to ground capabilities.
- 6. Service ability-all accessible from ground.
- 7. Mirror well designed reduce breakages.
- 8. Machine is very quiet.
- 9. Reversing camera great advantage.

The advantage of the automatic greasing system is that it supplies exactly the right amount of grease to each lubrication point, thus saving time, reducing wear of moving parts and decreasing the grease consumption by up to 50%.
